Prestigious Award for Young Environmental Scientists and Technologists - Exploring New Frontiers in the Field of Aquaculture

The Virology Conference Committee is pleased to announce that "15th International Conference on Aquaculture & Marine Biology" will be held on July 22-23, 2021 in Dubai, UAE.

The advancements in aquaculture and marine biology are continuing apace. The curriculum for the Dentistry Conference dives into strategic issues.

Young Scientist Awards in Aquaculture & Marine Biology Conference Committee intends to honor distinguished awards for exceptional Young researchers, scientists, Young Investigators, Post-Graduate students, Post-doctoral fellows, Trainees, and Junior professors in appreciation of their excellent contribution to the conference subject. The Young Scientist Awards make every effort to provide early career academicians with a significant professional development opportunity by bringing them together with professionals to exchange and share their expertise on all parts of virology.

Aquaculture & Marine Biology Young Research Awards for the Nomination: Only 25 presentations are accepted in the Environmental Science & Technology Young Researcher Forum for Outstanding Masters/Ph.D./Post Doctorate Thesis Work Presentation.

- The winners will get a certificate and a souvenir for winning the Young Scientist Award.
- Through oral presentations, our conferences provide the ideal platform for your research.
- Network to learn about career advancement and the latest technologies.
- This Forum will provide young scientists with timely and relevant information.

- A platform for young researchers to collaborate in order to advance their careers.
- Provide opportunities for research interaction with established senior investigators in the field from across the world
- Share ideas with notable researchers and mentors.
- Young researchers have a unique opportunity to learn about different research areas and broaden their research knowledge.
- Young Investigators, Post-Graduate students, Postdoctoral fellows, Trainees, and Junior Faculty with a minimum of 5 years of research experience are all eligible.
- The presentation must take place during the conference's scientific sessions.
- Only one manuscript can be submitted by each Young Researcher / Young Scientist (as first author or co-author).
- Age restriction: under 35 years old
- All contributions must be written in the English language.

Aquaculture & Marine Biology provides the ideal platform for expanding your network, allowing you to meet scientists, authorities, and contract research organizations from all around the world. It's now or never to join Environmental Science & Technology for the purpose of marketing your research work and receiving major awards in all categories. We look forward to your input and extraordinary dedication to making our Aquaculture & Marine Biology more successful in this illustrious position.
